

As we have seen, lots of entrepreneurs found GbR companies without even knowing it. We have also seen that running a GbR means running big risks so you want to found a „real“ company such as a GmbH as soon as possible. Being a professional, you want to set things in order in the meantime though. Get all of your partners together and shape a GbR-contract.

The GbR-contract may be your first professional contract after all so take special care with it. You can get a good copy in the starter kit here and customize it according to your preferences.
